DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 20 April 2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent issuing from U.S. application serial No. 10/706,915 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-3 and 13-16 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art or record fails to teach or fairly suggest a wafer processing apparatus for processing a wafer transferred from a clean box having an access opening to allow accessing an inside of the clean box and a lid to close the access opening wherein the inside of the clean box is separated from a circumstance of the outside of the clean box by closing the access opening with the lid, said wafer processing apparatus comprising: a chamber pressurized to a pressure higher than a pressure of an outside of the chamber; a first opening formed on a part of a wall of the chamber; a first opening formed on a part of a wall of the chamber for transferring a wafer between the clean box and the chamber through said first opening; and a door member capable holding the lid of the clean box, wherein said door member moves between a closed position to close the access opening and said first opening and an open position to open the access opening

and said first opening; wherein an outer periphery of said door member is larger than a periphery of said first opening to cover a whole part of said first opening from the inside of said chamber, wherein a first gap is formed between the wall of the chamber and an outer periphery portion of said door member which portion is larger than the outer periphery of said first opening at the closed position, wherein a stopping device is provided to stop the clean box a predetermined distance away from the outer surface of the wall to thereby form a second gap between the clean box and an outer surface of the wall of the chamber, wherein, a flow rate of gas flowing through the first gap from an inside of the chamber to an outside of the chamber is substantially equal to a flow rate of gas flowing out through the second gap from the first opening to an outside environment. Nor was any additional prior art located which taught or fairly suggest the claimed invention in whole and/or in part.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
